SUMMARY

Senior Frontend Engineer with 15+ years of experience specializing in scalable React architectures and high-performance integrations. Proven track record of building modular component libraries and frontend frameworks that bridge the gap between complex APIs and seamless user experiences. Focused on optimizing Core Web Vitals and Developer Experience (DX) to drive measurable business growth and site reliability.

TECHNICAL SKILLS

Languages - HTML5, CSS, Sass, CSS Modules, JavaScript, TypeScript, PHP

Frameworks and libraries - React, Angular, jQuery, Express

Tools - TanStack Query, GitHub, Vite, Webpack, GraphQL, Rest APIs, Cypress, Lighthouse, ESLint, Prettier, Node.js, Claude Code, Gemini

CMS - eCommerce platforms (Shopify, BigCommerce, Magento2, etc.), WordPress, WHMCS, phpBB

PROFESSIONAL EXPERIENCE

Searchspring - Senior Frontend Engineer and Team Lead from November 2014 to March 2026

- Engineered complex real-time search discovery tools using proprietary SDKs and APIs, delivering high-performance UI / UX for major retail clients
- Developed internal scaffolds and component libraries that significantly reduced project implementation time and improved developer experience by 50%
- Architected "Snap Templates", a modular theme system that empowered clients to build high-conversion frontend experiences while internally standardizing architectural patterns across the organization
- Utilized automated testing workflows with Cypress and Lighthouse and defined a manual, more specific QA checklist based on customer requirements
- Spearheaded technical scoping for high-revenue custom requirements, bridging the gap between client needs and engineering execution
- Provided technical leadership and mentorship, defining organizational standards for code quality, accessibility (A11y), and performance optimization
- **Stack** - React, TypeScript, Sass, CSS-in-JS, HTML5, GraphQL, REST APIs, Cypress, Lighthouse

Power Plant Media - Frontend Web Developer from October 2013 to September 2014

- Architected and deployed custom WordPress mobile-first themes and plugins for clients, shifting from monolithic setups to modular, maintainable codebases

- Additionally built themes for WooCommerce and WHMCS and integrated third-party services (Mailchimp, Yoast SEO) to extend site functionality
- Implemented Schema.org markup and rich snippets to improve organic search visibility and click-through rates
- Constructed HTML email newsletters, ensuring they are readable on various email providers
- **Stack** - HTML5, CSS, Sass, Compass, PHP, JavaScript, jQuery, Photoshop

Decentrix Inc. - Frontend Web Developer and Graphic Designer from April 2013 to September 2013

- Modernized legacy codebases for DISH authorized retailers, transitioning outdated systems to modern web standards to improve cross-browser compatibility and page performance
- Engineered custom frontend components and UI enhancements, ensuring a seamless and high-performance user experience across a high volume of retailer sites
- Optimized web assets and delivery by creating performant image sprites, UI elements, and optimized CSS and JavaScript to reduce page load latency
- **Stack** - JavaScript, jQuery, HTML5, CSS3, Photoshop, IntelliJ IDEA

AT&T - Implementation Specialist from April 2010 to April 2013

- Engineered custom productivity tools using JavaScript and HTML to automate character translation and data validation
- Led technical QA and code reviews for large-scale content deployments on att.com, ensuring high standards for production code integrity and cross-browser consistency
- Participated in site-wide "scrubs" and legacy code clean-up efforts within TeamSite to improve maintainability and remove technical debt
- Analyzed complex project requirements to translate business logic into functional web content, proactively identifying and resolving architectural bottlenecks before deployment
- **Stack** - JavaScript, HTML5, CSS, TeamSite

Hilton Worldwide - Web Analyst from November 2007 to April 2010

- Deployed global frontend updates and promotional content across the Hilton Worldwide brand portfolio, ensuring visual and functional consistency for millions of users
- Optimized digital assets and UI components for web delivery, leveraging CMS tools (TeamSite, MediaBin) to maintain high-performance standards across Hilton.com and brand-specific sites
- Maintained production code integrity through rigorous HTML and CSS editing, technical copywriting, and proofreading
- **Stack** - HTML, CSS, JavaScript, Photoshop, TeamSite, MediaBin

PROJECTS AND VOLUNTEER WORK

FF7 For St. Jude - December 2020 to Current, [View project](#)

- Assisted in organizing and managing a global charity event where Final Fantasy VII speed runners get together to raise money for St. Jude Children's Research Hospital
- Architected a real-time React dashboard integrated with the Tiltify API to visualize live donation data and milestones for a global charity event
- Raised over \$53,000 to date for St. Jude Children's Research Hospital through technical coordination and event management

Girls in Tech - November 2019 to November 2020

- Co-founded the Colorado Springs chapter and managed web updates to drive community engagement and launch the first event

Barkabull Dog Rescue - October 2018 to March 2019

- Provided specialized care and fostering for dogs in transition, managing medical and behavioral needs to ensure successful permanent adoptions

EDUCATION

Bachelors, Communication and Writing Arts - Rowan University, May 2006

Associates, Arts and Sciences with English Option - Rowan College at Gloucester County, May 2004
